

# Bug Hunter 4

The bug police has heard of your remarkable skills as a Python programmer.

They have recruited you as a bug hunter to help them find and fix bugs in their code.

## Instructions

Find the bug in the following code:

```
def remove_negatives(numbers):  
    for number in numbers:  
        if number < 0:  
            numbers.remove(number)  
    return numbers  
  
numbers_list = [1, -2, 3, -4, -5, 6, -7, -8]  
print(remove_negatives(numbers_list)) # Expected:  
[1, 3, 6]
```

Copy and paste the code from the attached python file instead of the one given above.

## Guidelines

- Use the strategies learnt in the Debugging lesson:
  - Reading the error
  - Debugging with print statements
  - Rubber duck (explain your problem to someone or something)
  - Debugging with `pdb`

## To submit

Fixed code, with the fixed line explained with a comment.
